

## Bravo Launches Interactive 3D and 360 Degree Presentation for the Luanga Project on the VRIFY Platform

**VANCOUVER, May 2, 2023** – Bravo Mining Corp. (TSX.V: BRVO, OTCQX: BRVMF), (“Bravo” or the “Company”) is now live on the VRIFY Technology Inc. (“VRIFY”) platform. Investors can access Bravo’s first presentation containing an interactive 3D model of the property geology and reported drilling to date, in addition to a 360 degree virtual site visit. The Company will continue to periodically update its interactive content alongside drill results and other catalysts as the Luanga palladium + platinum + rhodium + gold + nickel project (“Luanga” or “Luanga PGM+Au+Ni Project”) continues to be advanced.

Luis Azevedo, Chairman and CEO stated: “Luanga is a large mineralized system (~8.1km long) located in Brazil’s Carajás Mineral Province, an infrastructure rich, world class mining jurisdiction. As we advance our extensive exploration program, partnering with VRIFY will assist our stakeholders and shareholders to better understand the potential scale of Luanga’s emerging Tier 1 deposit with powerful and interactive visuals of our project site, surrounded communities, infrastructure and work to date.”

Both interactive presentations are also available at [www.bravomining.com](http://www.bravomining.com).

### About VRIFY Technology Inc.

VRIFY’s interactive 3D and 360 degree presentations equip mining companies and investors with powerful visual context, supported by tools that streamline two-way communication and meetings. By offering a faster and more accurate way to discover and assess any mining company’s investment potential, the VRIFY platform is building a more transparent mining investment ecosystem.

For information about VRIFY or to join the growing community, please visit [www.vrify.com](http://www.vrify.com).

### About Bravo Mining Corp.

Bravo is a Canada and Brazil-based mineral exploration and development company focused on advancing its Luanga PGM+Au+Ni Project in the world-class Carajás Mineral Province of Brazil.

The Luanga Project benefits from being in a location close to operating mines, with excellent access and proximity to existing infrastructure, including road, rail and clean and renewable hydro grid power. The project area was previously de-forested for agricultural grazing land. Bravo’s current Environmental, Social and Governance activities includes replanting trees in the project area, hiring and contracting locally, and ensuring protection of the environment during its exploration activities.

**Forward Looking Statements**

*This news release contains forward-looking information which is not comprised of historical facts. Forward-looking information is characterized by words such as “large”, “potential scale”, “excellent”, “world class”, “extensive” variants of these words and other similar words, phrases, or statements that certain events or conditions “will” or occur. This news release and Bravo’s 3D renderings showed on Vrify Technology Inc. online platform contains forward-looking information pertaining to the Company’s ongoing drill programs and the results thereof; the expected completion of geophysical surveys and the results of such surveys; the potential for the definition of new styles of mineralization and extensions to depth, the interpretation that Ni grades increase in the basal portions of the intrusion, the potential for a feeder zone(s) and the Company’s plans in respect thereof. Forward-looking information involves risks, uncertainties and other factors that could cause actual events, results, and opportunities to differ materially from those expressed or implied by such forward-looking information. Factors that could cause actual results to differ materially from such forward-looking information include, but are not limited to, unexpected results from exploration programs, changes in the state of equity and debt markets, fluctuations in commodity prices, delays in obtaining required regulatory or governmental approvals, environmental risks, limitations on insurance coverage; and other risks and uncertainties involved in the mineral exploration and development industry. Forward-looking information in this news release is based on the opinions and assumptions of management considered reasonable as of the date hereof, including, but not limited to, the assumption that the assay results confirm that the interpreted mineralization contains significant values of nickel, PGMs and Au; that the mineralization remains open to depth, that grades are improving to depth, that final drill and assay results will be in line with management’s expectations; that activities will not be adversely disrupted or impeded by regulatory, political, community, economic, environmental and/or healthy and safety risks; that the Luanga Project will not be materially affected by potential supply chain disruptions; and general business and economic conditions will not change in a materially adverse manner. Although the Company believes that the assumptions and factors used in preparing the forward-looking information in this news release are reasonable, undue reliance should not be placed on such information. The Company disclaims any intention or obligation to update or revise any forward-looking information, other than as required by applicable securities laws.*
